

Focus on what's most important

Collaborate securely & privately, enterprise-wide

Mattermost was built for enterprises like yours, it offers the features of collaboration products on an open-source enterprise grade platform, with unlimited customizations through plugins, APIs and the full product source code and the kind of locked out security and privacy you can't get with SaaS services.

Bring your tools and teams together on a single platform.

Communicate Seamlessly

- 1 Organized conversations in teams and channels
- 2 Fully searchable message history
- 3 1-on-1 and group messaging
- 4 File type restrictions to ensure security
- 5 An archive of logs with a complete history of messages is stored
- 6 File, image, and link sharing
- 7 Managed Services Model
- 8 TLS/SSL encryption on all data transmission

Real-time collaboration on all your devices

The Mattermost app is compatible with all widely used platforms including Windows, macOS, Android and iOS. Added to this, common plugins like Jira, GitHub and Webex along with many others are also available on the Mattermost Marketplace that makes it easier to find, install, and manage plugins.
