Navigating Regulatory and Technical Cloud Imperatives

Data sovereignty requires local storage, processing, and management of digital data within Pakistan's borders.

[Read More](#)

Personal Data Protection Bill 2023 imposes substantial fines for violations of personal information security.

[Read More](#)

Organizations face challenges merging on-site data centers with cloud services due to tech stack variances, causing operational complexity.

Certain applications such as financial trading platforms and real time data analytics systems require low latency.

Personal Data Protection Bill 2023's implications for financial industry's compliance?

Low latency requirements: effects on financial trading and analytics?

Integrating cloud and on-site data centers: challenges for the media industry?

Real World Stories

"When we needed capacity, we pushed our workloads into the cloud. I didn't worry about waiting months for hardware. I knew I had capacity."

Molina Healthcare

"We needed a solution that gave our developers and administrators the ability to use common tool sets on-premises and in the cloud, while meeting our security requirements and keeping capital and operational costs to a minimum"

Canadian Museum

"Because regulations prohibit us from putting sensitive data in the public cloud, our developers have limited options when they are developing and testing applications; they can't test the full application on regular cloud solution,

But with the current solution, they have much more freedom to do quality assurance testing because the systems are on-premises."

KPMG Norway

"We've shortened decision-making time by being able to move the compute to the data rather than the data to the compute,

With this new solution, we get the best possible intelligence out of that data, much better than if we had to send it over satellite networks or line-of-sight networks back to a main base."

Haivision

Product in Practice

Financial Services

- Meet regulatory and data sovereignty requirements
- Modernize financial apps
- Speed up cloud migration

Government

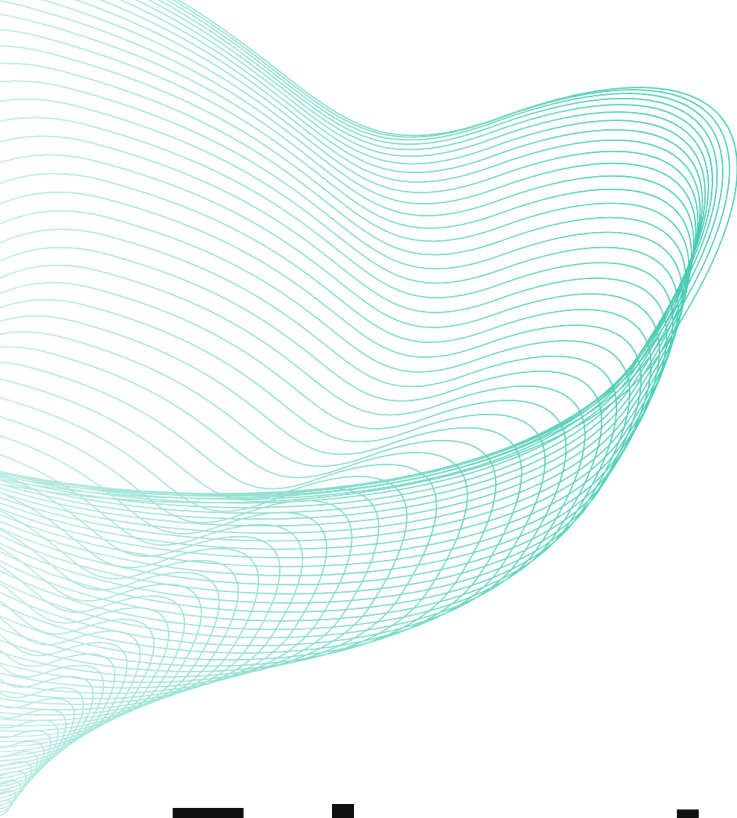

- Update and extend legacy apps
- Improve citizen services
- Meet compliance regulations

Media and Entertainment

- Enhances content delivery speed.
- Supports scalable computing resources.
- Ensures data protection, compliance.

Healthcare

- Improve analytics and records management
- Modernize legacy systems
- Update clinical environments

Teleport

Beyond Boundaries,
Beyond Barriers

The Adaptable Bridge

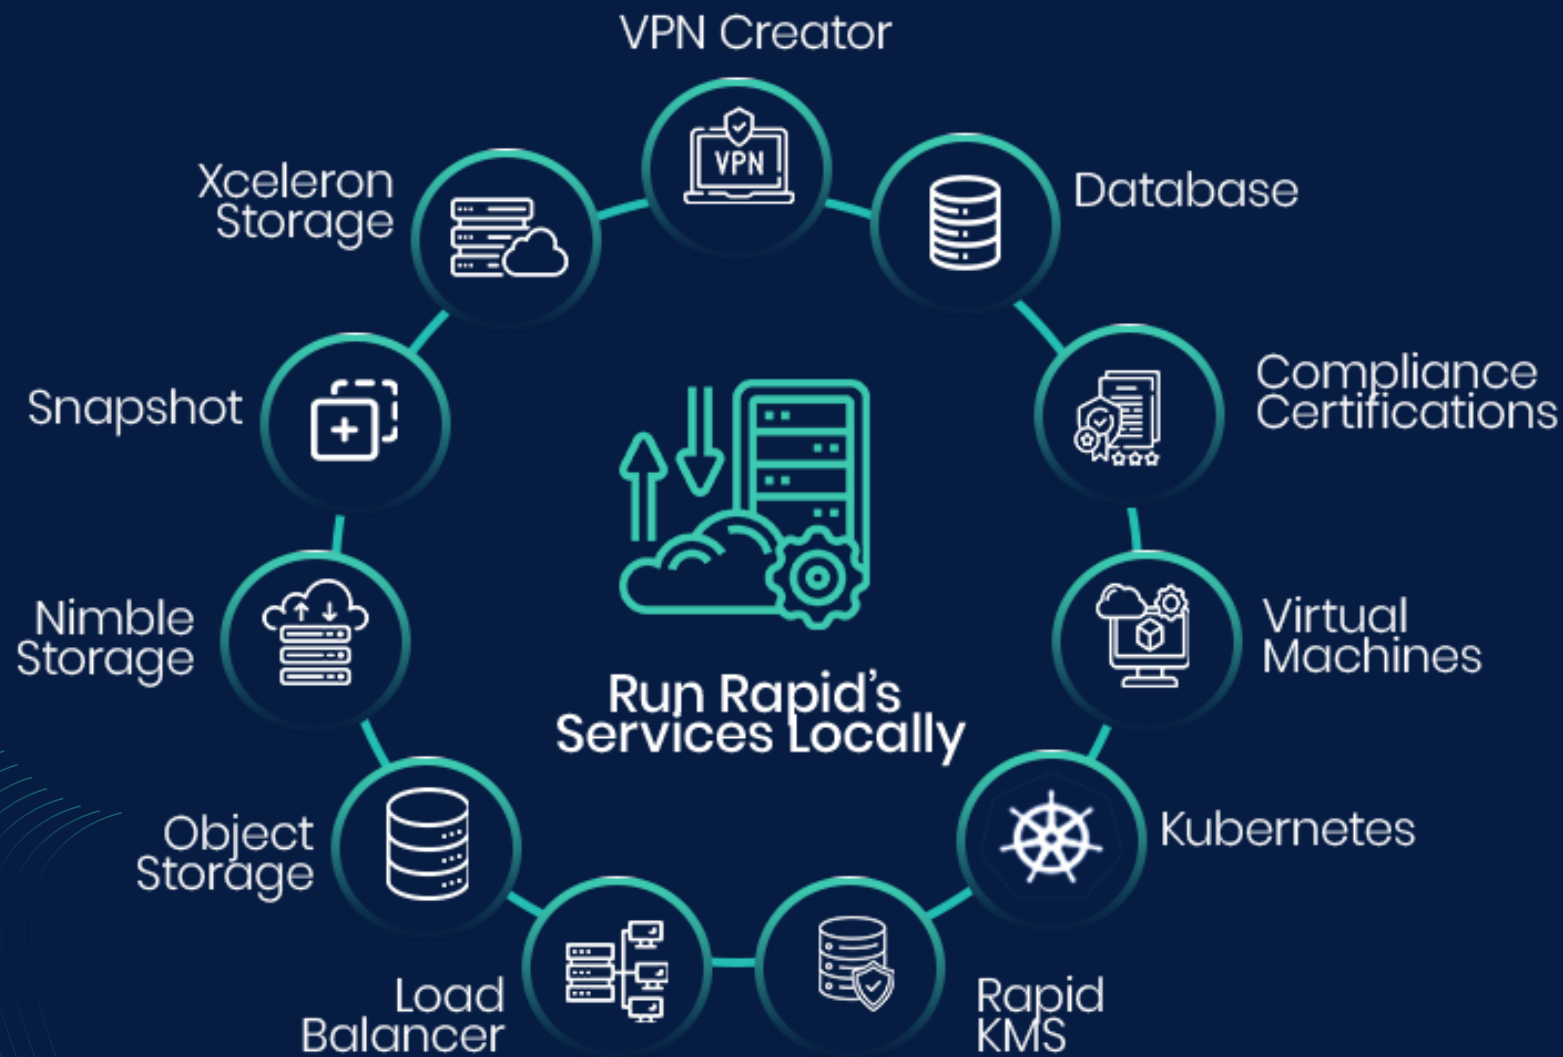

Utilize select Rapid Cloud services locally while providing seamless integration with a wide array of services available in the local Rapid Cloud Region.

Dual Options, Total Control

Choose from fully or partially managed solutions for a tailored hybrid experience.

Extend Your Reach

Seamlessly expand your infrastructure to any location — on-premises or edge.

It's all in the details

Hypervisors

Agile, cost-effective developer friendly

Robust, scalable, enterprise-ready

Storage

Fast, reliable, optimized.

Hardware

Brands we trust with performance

HUAWEI

Greater Autonomy with Self-Provisioning Portal

Insights Hub

Discover the ease of tracking metrics with Insights Hub

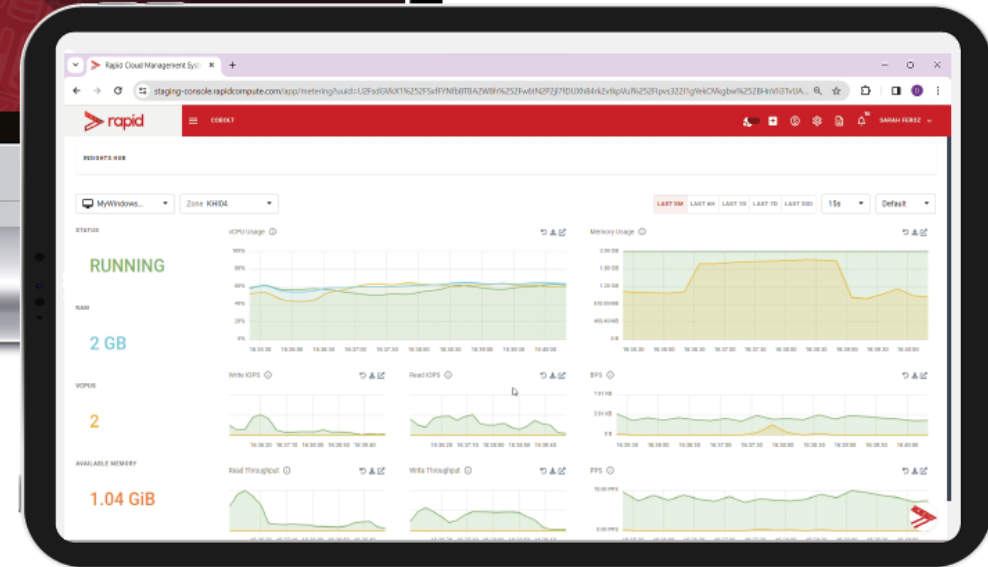

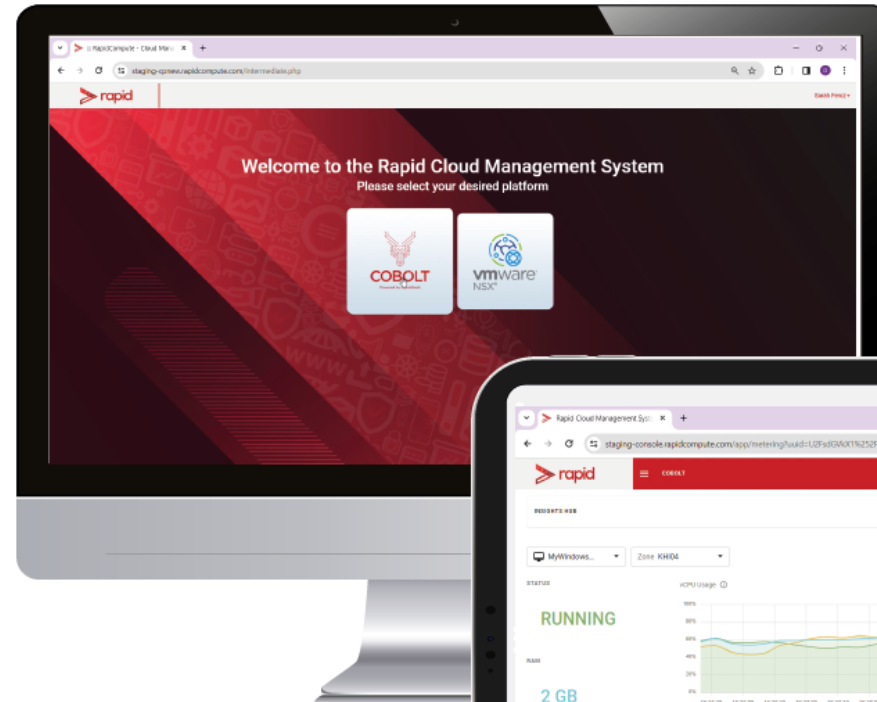

Internal Metering

Track monthly consumption in real-time.

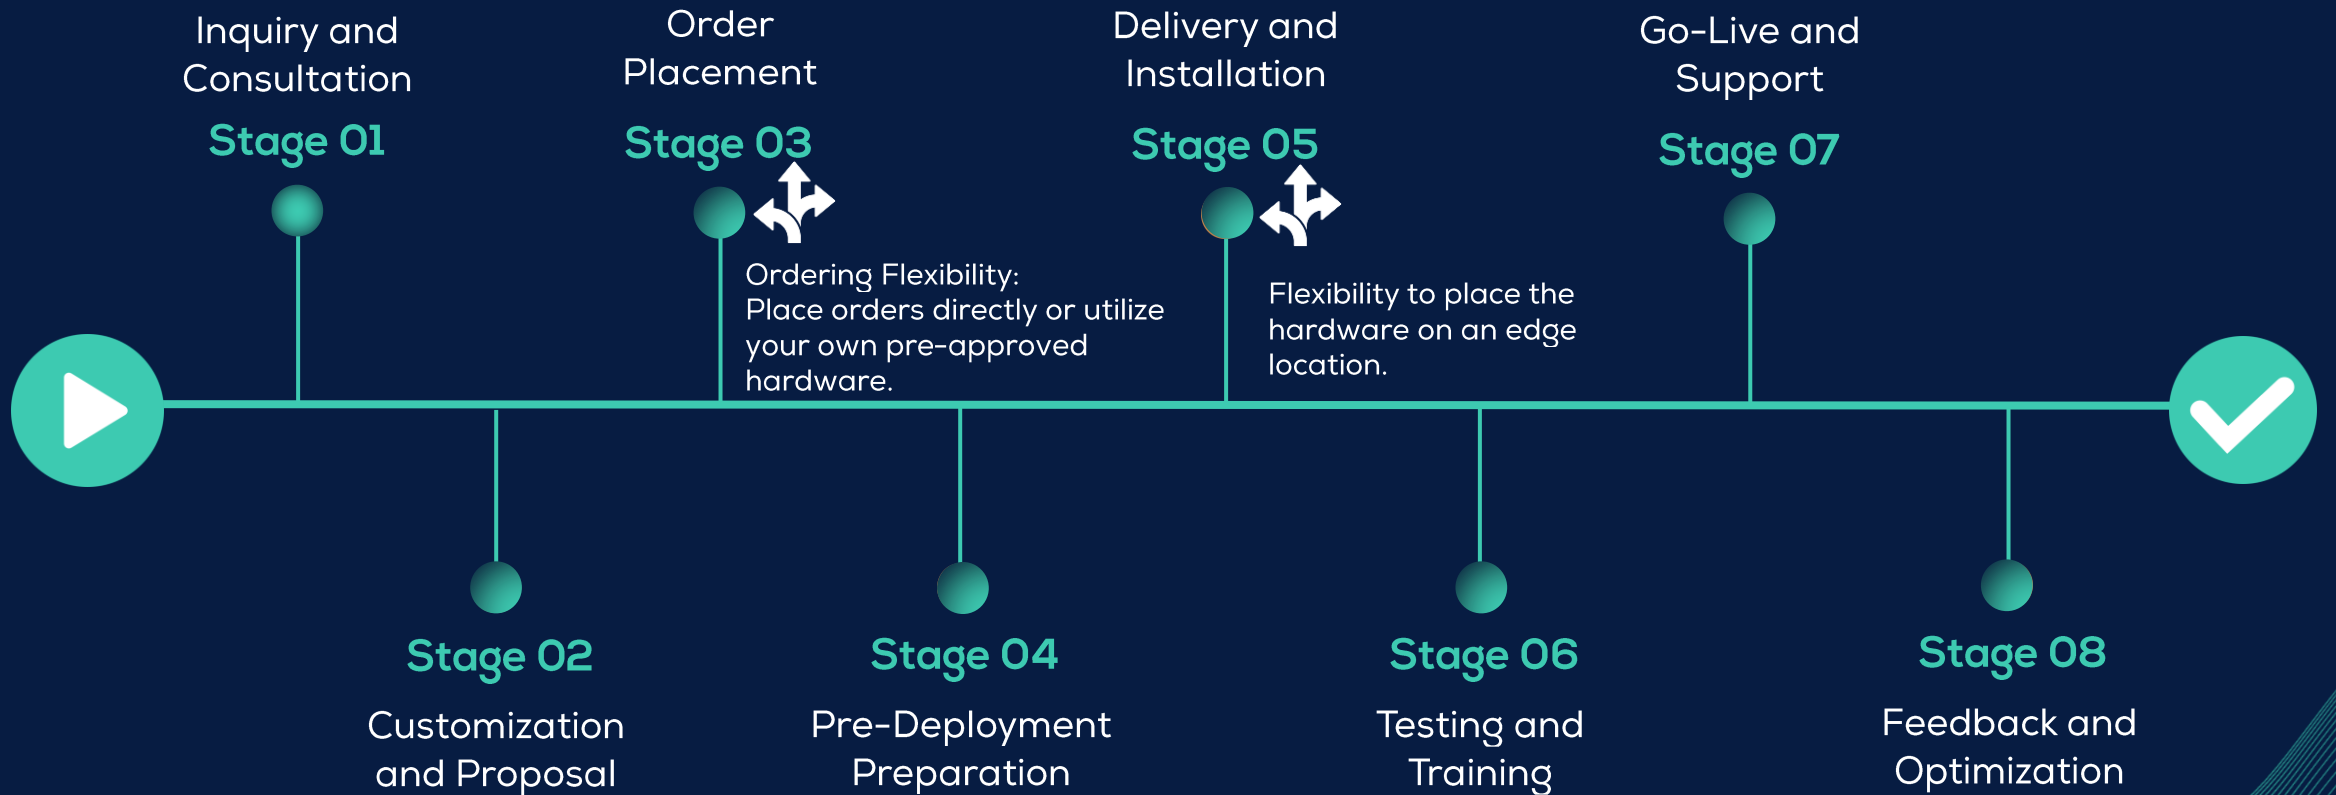

Documentation

Complete documentation for a swift and seamless start.

YOUR JOURNEY WITH TELEPORT

COST EFFECTIVE

01

Tailored Hardware
Choose 42U or modular 2U/4U units

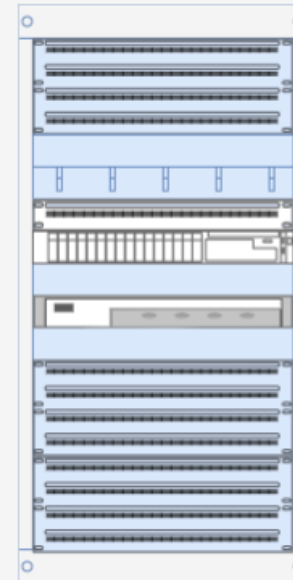

02

Reduced Operational Costs
Managed services lower IT expense

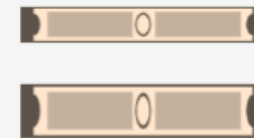

03

Streamlined Tech
Simplified system management

42U Rack

1U/2U Servers

Security and Compliance

Our commitment is to ensure the security and reliability of our software stack, while also collaborating with the client to establish a secure and compliant environment for the infrastructure.

Shared Responsibility Matrix

	Responsibility	
Responsibility always retained by the customer	Access Control	Customer
	Security Policies and Procedures	Customer
	Team Management	Customer
	Application Security	Customer
	Configuration Management	Customer
	Compliance with Industry Standards for Application	Customer
	Data in-transit Security	Customer
Responsibility varies by type	Data Security	Shared
	Data at-rest Security	Shared
Responsibility transfers to service provider	Compliance with Industry Standards for Infrastructure	RapidCompute
	Software Stack Security	RapidCompute
	Infrastructure Level Network Security	RapidCompute
	Incident Response	RapidCompute
